📜Projects

## H-Machinery

Hmachinery.ir

This website is created for "شرکت هگمتان قطعه"

To receive the order and review and then pay. All this is done in the admin panel
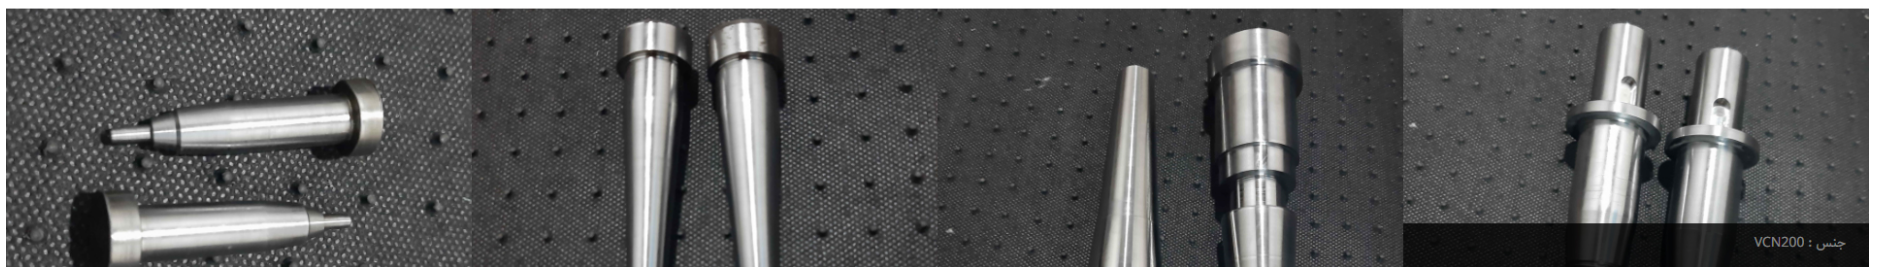

There is also an articles section on this website.

🌟Some features of this website:

- Manage multi-user access

- API (DRF) in the admin panel

- Optimize the image of articles in the list of articles for site speed

- Review bills and pay them

- Handle a project created by a colleague

صد نگار

This website is made for psychological analysis

This website makes full use of API

Technology used:

- Django
- Django REST framework (DRF)
- API
- Git
- Token Authentication
- Vue.js
- Vuetify

Prescription

My responsibility is developing server side (RestAPI)

This is a working a progress...
